

Cloud Quest: Operation Site Revival

TASK 1 : Secured the Environment

- Created an IAM user – Rescue_Lead
- Gave user only FullAmazonS3 access permission
- Enabled MFA via google authenticator app.

TASK 2: Built the Frontend (Website Rescue)

- Created a simple index.html static website.
- Created a bucket – iamtherescuebucket
- Changed the bucket policy to allow public access and hosting
- Uploaded the index.html file to the bucket.
- Used Amplify to deploy the website.

✔ **Successfully created bucket "iamtherescuebucket"**
To upload files and folders, or to configure additional bucket settings, choose **View details**.

▶ **Account snapshot - updated every 24 hours** All AWS Regions
Storage lens provides visibility into storage usage and activity trends. Metrics don't include direct

index.html 	-	text/html	2.4 KB	✔ Succeeded

About Us

We are a forward-thinking team solving real-world problems with smart, scalable solutions. Our mission is to deliver value to businesses and people through innovation and technology.

Why Partner With Us?

- Proven track record of building impactful solutions
- Strong market potential and revenue growth
- Backed by a team of experts in AI, Cloud, and Engineering

TASK 3: Simulated the backend using MongoDB Atlas (Data Recovery)

- Created a cluster
- Connected it to my MongoDB Compass
- Created a database – GENZTECH
- Created a collection – CONTACT_FORM
